Yuki Tanaka

Senior Backend Engineer - payments and high-throughput APIs

yuki.tanaka@example.com | 555-0106 | Osaka

Target role: Backend Engineer | SYNTHETIC SAMPLE CV - fictional person, for software testing only

PROFESSIONAL SUMMARY

Backend engineer with 6 years of experience designing payment and ledger services in Python. Led the migration of a monolith to FastAPI microservices handling 4 million requests per day, and mentors junior engineers.

TECHNICAL SKILLS

Python, FastAPI, PostgreSQL, Redis, Celery, Docker, Kubernetes, AWS (ECS, RDS, SQS), SQLAlchemy, pytest, REST API design

EXPERIENCE

Senior Backend Engineer, Brightledger Payments (fictional) [4 yrs]

- Split a Django monolith into six FastAPI services; cut p95 latency of the checkout API from 900 ms to 210 ms.
- Designed an idempotent payment-capture flow using database unique keys and Redis locks to prevent double charges.
- Introduced Celery workers with SQS for reconciliation jobs; reduced nightly batch time from 5 hours to 50 minutes.

Backend Developer, Tandem Logistics (fictional) [2 yrs]

- Built REST endpoints for shipment tracking in Flask and PostgreSQL; added composite indexes that removed a full table scan.
- Wrote the first CI pipeline (GitHub Actions) and Docker images used by all backend teams.

PROJECTS

Ledgerlite (open-source)

Double-entry accounting library in Python with property-based tests (Hypothesis) and a FastAPI demo.

Rate-limit gateway

Token-bucket rate limiter backed by Redis scripts, benchmarked at 20k requests per second.

EDUCATION

B.Sc. Computer Science, Kansai University of Technology (fictional)

CERTIFICATIONS

AWS Certified Developer - Associate
