Raj Kumar

Backend Developer - Django and PostgreSQL

raj.kumar@example.com | 555-0108 | Hyderabad

Target role: Backend Engineer | SYNTHETIC SAMPLE CV - fictional person, for software testing only

PROFESSIONAL SUMMARY

Backend developer with 4 years of experience building Django applications for an insurance-quotes platform, with a focus on database design and query performance.

TECHNICAL SKILLS

Python, Django, Django REST Framework, SQL, PostgreSQL, Celery, Redis, Docker basics, Git, pytest

EXPERIENCE

Backend Developer, Sureline Quotes (fictional) [3 yrs]

- Built the quote-calculation API in Django REST Framework serving 15,000 requests per day.
- Removed N+1 queries with select_related and prefetch_related, cutting the policy list endpoint from 2.4 s to 300 ms.
- Moved PDF generation to Celery workers so the quote endpoint no longer blocks.

Software Trainee, Deccan Infosystems (fictional) [1 yr]

- Maintained a Django admin portal and wrote SQL reports for the operations team.

PROJECTS

Fleet maintenance tracker

Django app with role-based permissions and scheduled reminders.

Query-plan notes

Internal write-up comparing PostgreSQL index types on a 5-million-row table.

EDUCATION

B.Tech. Computer Science, Deccan Technical University (fictional)
