Lisa Anderson

Senior Full Stack Engineer - platform and product

lisa.anderson@example.com | 555-0109 | Oslo

Target role: Full Stack Engineer | SYNTHETIC SAMPLE CV - fictional person, for software testing only

PROFESSIONAL SUMMARY

Senior engineer with 7 years of experience across the stack. Designs data models, APIs and UIs for a logistics SaaS product and drives engineering standards across teams.

TECHNICAL SKILLS

Python, React, JavaScript, SQL, TypeScript, FastAPI, Next.js, PostgreSQL, Redis, Docker, AWS, observability, system design

EXPERIENCE

Senior Engineer, Fjordline Freight Software (fictional) [5 yrs]

- Designed the multi-tenant PostgreSQL schema (row-level security) and FastAPI layer that serves 300 customers.
- Led the React and Next.js rewrite of the customer portal; cut time-to-interactive by 45% and introduced shared TypeScript API types generated from OpenAPI.
- Created the team's incident process and distributed tracing setup with OpenTelemetry.

Software Engineer, Nordhavn Systems (fictional) [2 yrs]

- Built internal tools in Python and JavaScript; migrated a MySQL database to PostgreSQL with zero downtime using logical replication.

PROJECTS

OpenAPI type sync

Tool that regenerates TypeScript clients from FastAPI schemas in CI and fails the build on breaking changes.

Tenant-isolation tests

Property-based test suite proving that no query leaks data across tenants.

EDUCATION

M.Sc. Computer Science, Nordic Institute of Technology (fictional)

CERTIFICATIONS

AWS Certified Solutions Architect - Associate
