Adil Hassan

Junior Frontend Developer - JavaScript and TypeScript

adil.hassan@example.com | 555-0110 | Karachi

Target role: Frontend Engineer | SYNTHETIC SAMPLE CV - fictional person, for software testing only

PROFESSIONAL SUMMARY

Developer with 2 years of experience on a small team building a school-fees payment portal front end, moving from JavaScript to TypeScript and growing into testing and accessibility.

TECHNICAL SKILLS

JavaScript, TypeScript, CSS, HTML, React, Sass, Git, REST APIs, Jest basics

EXPERIENCE

Frontend Developer, Savanna Edutech (fictional) [1 yr]

- Implemented fee-statement tables with filtering and CSV export in React and TypeScript.
- Fixed a bug where double-clicking Pay produced duplicate requests by disabling the control and making the handler retry-safe.
- Paired with a senior engineer on code reviews and learned to split large pull requests into reviewable pieces.

IT Support Intern, Indus Valley University (fictional) [1 yr]

- Supported the registrar's office systems and automated a weekly enrolment export with a small script.

PROJECTS

Bus-timetable PWA

Offline-capable progressive web app using service workers and cached timetables.

Study-group finder

React front end with form validation and keyboard-accessible filters.

EDUCATION

B.Sc. Information Systems, Indus Valley University (fictional)
